This revision issued: October, 2024

## Section 1 - Identification of The Material and Supplier

### Neutraliser

Peroxide solutions - less than 8%

**Hairchem Professional 61 Jarrah Drive Braeside 3195**

October, 2014

Salon product used to mix with hair colours or blonding products as developers or with permanent waves as neutralisers.

## Section 2 - Hazards Identification

### Statement of Hazardous Nature

These products are classified as: Xi, Irritating. Hazardous according to the criteria of SWA.

Not a Dangerous Good according to the Australian Dangerous Goods (ADG) Code.

Risk Phrases: R36/38. Irritating to eyes and skin.

Safety Phrases: S17, S36, S24/25. Keep away from combustible material. Wear suitable protective clothing. Avoid contact with skin and eyes.

SUSMP Classification: S5

ADG Classification: None allocated. Not a Dangerous Good under the ADG Code.

UN Number: None allocated

Note: Status as skin and eye irritant only applies to concentrations of hydrogen peroxide of 5% or more.

### Emergency Overview

Physical Description & Colour: Clear, colourless or creamy white liquid.

Odour: No odour.

Major Health Hazards: irritating to eyes and skin.

### Potential Health Effects

#### Inhalation:

Short Term Exposure: Available data indicates that these products are not harmful. In addition product is unlikely to cause any discomfort or irritation.

#### Skin Contact:

Short Term Exposure: Available data indicates that these products are a skin irritant. Symptoms may include itchiness and bleaching of contacted skin.

#### Eye Contact:

Short Term Exposure: These products are an eye irritant. Symptoms may include stinging and reddening of eyes and watering which may become copious. Other symptoms may also become evident. Lengthy exposure or delayed treatment may cause permanent damage.

#### Ingestion:

Short Term Exposure: These products are an oral irritant. Symptoms may include burning sensation and reddening of skin in mouth and throat.

### Carcinogen Status:

SWA: No significant ingredient is classified as carcinogenic by SWA.

NTP: No significant ingredient is classified as carcinogenic by NTP.

IARC: Hydrogen Peroxide is Class 3 - unclassifiable as to carcinogenicity to humans.

See the IARC website for further details. A web address has not been provided as addresses frequently change.

## Section 3 - Composition/Information on Ingredients

Conc, %

TWA (mg/m<sub>3</sub>) STEL (mg/m<sub>3</sub>)

Hydrogen peroxide 7722-84-1 < 81.4 not set

Other non hazardous ingredients to 100 not set not set

This is a commercial product whose exact ratio of components may vary slightly. Varying quantities of other non hazardous ingredients are also present.

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

## Section 4 - First Aid Measures

### General Information:

You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 1126 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Have this SDS with you when you call.

**Inhalation:** First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

**Skin Contact:** Wash gently and thoroughly with warm water (use non-abrasive soap if necessary) until product is removed. Under running water, remove contaminated clothing, shoes and leather goods (e.g. watchbands and belts) and wash them before reuse. If irritation persists, repeat flushing and seek medical attention.

**Eye Contact:** Immediately flush the contaminated eye(s) with lukewarm, gently flowing water until the product is removed, while holding the eyelid(s) open. Take special care if exposed person is wearing contact lenses.

**Ingestion:** If swallowed, do NOT induce vomiting. Wash mouth with water and contact a Poisons Information Centre, or call a doctor.

## Section 5 - Fire Fighting Measures

**Fire and Explosion Hazards:** There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

These products are likely to decompose only after heating to dryness, followed by further strong heating.

Fire decomposition products from this product are not expected to be hazardous or harmful.

**Extinguishing Media:** Not Combustible. Use extinguishing media suited to burning materials.

**Fire Fighting:** If a significant quantity of these products are involved in a fire, call the fire brigade.

**Flash point:** Does not burn. However, if involved in a fire, may intensify the fire.

**Upper Flammability Limit:** Does not burn.

**Lower Flammability Limit:** Does not burn.

**Autoignition temperature:** Does not burn.

**Flammability Class:** Does not burn.

## Section 6 - Accidental Release Measures

**Accidental release:** While cleaning up a spill, wear goggles and gloves. Absorb onto suitable absorbent material like vermiculite, sand or kitty litter. Sweep up and shovel or collect recoverable product, and dispose of promptly. After sweeping up, wash area with water. Thoroughly launder protective clothing before storage or re-use. Advise laundry of nature of contamination when sending contaminated clothing to laundry.

## Section 7 - Handling and Storage

**Handling:** Keep exposure to this product to a minimum, and minimise the quantities kept in work areas. Check

Section 8 of this SDS for details of personal protective measures, and make sure that those measures are followed.

**Storage:** Store in a cool, well ventilated area, out of direct sunlight. Check packaging - there may be further storage instructions on the label.

This revision issued: October, 2024

## Section 8 - Exposure Controls and Personal Protection

The following Australian Standards will provide general advice regarding safety clothing and equipment:

Respiratory equipment: AS/NZS 1715, Protective Gloves: AS 2161, Occupational Protective Clothing: AS/NZS 4501 set 2008, Industrial Eye Protection: AS1336 and AS/NZS 1337, Occupational Protective Footwear: AS/NZS2210.

### SWA Exposure Limits

TWA (mg/m<sup>3</sup>)

STEL (mg/m<sup>3</sup>)

Hydrogen peroxide 1.4 not set

No special equipment is usually needed when occasionally handling small quantities. The following instructions are for bulk handling or where regular exposure in an occupational setting occurs without proper containment systems.

**Ventilation:** This product should only be used where there is ventilation that is adequate to keep exposure below the TWA levels. The use of exhaust fans is strongly recommended.

**Eye Protection:** Eye protection is recommended when these products are being used. You are strongly encouraged to wear protective glasses or goggles.

**Skin Protection:** We suggest that routine unprotected and long term contact with these products should be avoided and that suitable gloves should be worn during use.

**Protective Material Types:** We suggest that protective clothing be made from the following materials: rubber, PVC.

**Respirator:** Usually, no respirator is necessary when using this product.

## Section 9 - Physical and Chemical Properties:

**Physical Description & colour:**

**Odour:**

**Boiling Point:**

**Freezing/Melting Point:**

**Volatiles:**

**Specific Gravity:**

**Water Solubility:**

**pH:**

Clear, colourless or creamy white liquid.

No odour.

Approximately 100°C at 100kPa.

Approximately 0°C.

Completely volatile at 100°C.

1.01 to 1.03

Completely soluble in water.

Mildly acidic; pH 2.0-4.0

## Section 10 - Stability and Reactivity

**Reactivity:** Slowly decomposes to water and oxygen gas - decomposition is faster in warm conditions or if the bottle is in direct sunlight. This product must not be mixed with Alkaline perm products as a strong reaction will take place, causing the mixture to heat strongly. This may lead to burns to either the salon worker or the customer.

**Conditions to Avoid:** This product should be kept in a cool place, preferably below 30°C. Keep containers and surrounding areas well ventilated. Keep isolated from combustible materials. Protect this product from light.

**Incompatibilities:** reducing agents, combustible materials.

**Fire Decomposition:** These products are likely to decompose only after heating to dryness, followed by further strong heating. oxygen gas.

**Polymerisation:** This product will not undergo polymerisation reactions.

## Section 11 - Toxicological Information

**Local Effects:**

**Target Organs:**

skin, eyes

## Classification of Hazardous Ingredients

**Ingredient**

**Risk Phrases**

Hydrogen Peroxide >=5% Conc <20%: Xi; R36/38

This means that hydrogen peroxide is considered irritating to skin and eyes at concentrations between 5 and 20%.

## Section 12 - Ecological Information

These products are biodegradable. It will not accumulate in the soil or water or cause long term problems.

## Section 13 - Disposal Considerations

**Disposal:** Small quantities as used in a salon may safely be flushed down the sink. However, if you have old or redundant stock, call your local council, or your supplier for disposal advice.
